

QIS – ALL IN

QUALITY INCLUSIVENESS IN SPORT FOR EVERYONE

About the project

QIS – All In is an Erasmus+ Sport project dedicated to improving the accessibility and inclusiveness of sports facilities for people of all abilities.

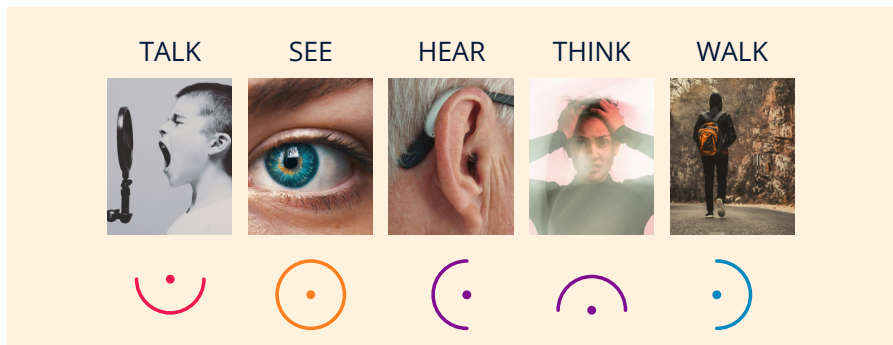

The project is developing a structured evaluation framework and practical manual to help sports organizations assess how welcoming and accessible their facilities truly are – for everyone, including individuals with diverse mobility, sensory, cognitive, or temporary needs – and how they can take meaningful steps to improve them.

What our logo tells

The project also introduced a strong visual identity.

The QIS – All In logo symbolises inclusion, diversity of abilities, and equal access to sport, reflecting the project's core mission: sport for everyone.

Why it Matters

1 in 3

Europeans live with some form of disability

Around 135 million people

have some form of disability (in WHO Europe Region)

Project website is live!

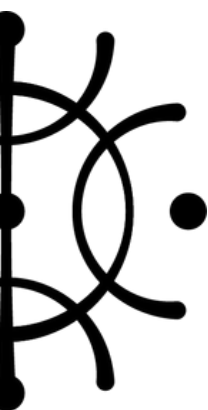

The project website is now live and will serve as the main platform for updates, events, and resources. [\[qis.multisportclubs.eu\]](https://qis.multisportclubs.eu)

MEETINGS & EVENTS

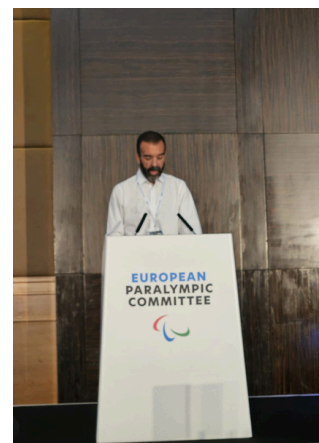

Kick-off Meeting in Lisbon

Our journey officially began in February 2025 with the Kick-off meeting hosted by NPC Portugal. All eight partners gathered to align on project goals, responsibilities, and the vision behind QIS – All In. From inclusive design to certification tools, the stage was set for impactful collaboration across five countries.

Tiago Carvalho presents QIS – All In

Tiago Carvalho, Vice-President of NPC Portugal and EPC Board Member, introduced QIS – All In at the EPC Conference, held just ahead of the EPC General Assembly. In a short but impactful presentation, he highlighted the ambition behind the project's certification model and the importance of actively involving people with diverse abilities and lived experiences in shaping inclusive solutions.

Trying Adaptive Sports at TPM Malaga

In October 2025, project partners met in Malaga to experience accessibility firsthand. The Spanish Paralympic Committee welcomed the team to explore adaptive sports like goalball and wheelchair basketball, and to visit local sports facilities—evaluating accessibility from the user's perspective. These insights will directly feed into our tools and certification process.

State of the Art – Collection of Reference Frameworks and Best Practices Coming Soon!

We're working on a comprehensive Handbook on Accessibility in Sport Facilities, which will include best practices, design principles, and reference standards collected from across Europe. It will serve as the foundation for our certification process.
